7. Summer Field Work – John Clark had talked to me last month about trying to get the fields leveled off and topsoil brought in. I know a parent from my u9 team said he has equipment, and John was going to work on getting equipment too. Based on the current field conditions, I am not against it but will need to run past township first and probably need signoff by church. Perhaps I'll grab Nancy one night and show her the current issues with mostly the u9 fields, and a few spots on the u12/18 field. There is some topsoil available at the township building and we can always contact some local material suppliers (Ament, etc.) for pricing/donations.
